AN RARE SMALL ENGLISH PEWTER DISH OR 'SPICE PLATE'
15TH CENTURY

the broad rim with *Lombardic* lettering possibly 'GAL' or 'T', the bowl with raised circular boss, 'nature's gilding' patina
19CM. DIAMETER; 7½IN.

The presence of 'nature's gilding' would suggest that this piece was an archaeological find. The traces of a gold colour to the surface are a natural oxidation process that occurs to pieces of a certain alloy and of a great age.
